PR Newswire - Press Release

IT Intellectuals Offers RFID Technology Assessment and Solution to Enhance Business Performance and Productivity

11.27.06, 10:48 AM ET

FARMINGTON HILLS, Mich., Nov. 27 /PRNewswire/ -- IT INTELLECTUALS CORPORATION, which provides IT Consulting Services to Fortune 1000 companies in the Financial, Insurance, Pharmaceuticals, Telecommunication, Government, Transportation and Logistics industries, has a RFID Technology (Radio Frequency Identification) practice that offers flexible services to customers. Since 1999, IT Intellectuals has been offering a complete range of IT services throughout the United States from its Headquarters in Farmington Hills, MI and branch offices in Dallas, TX and San Diego, CA.

IT Intellectuals President and Owner, Ms. Abha Mallya says, "Our RFID team's primary goal is to help companies build and deploy RFID into their business process quickly and effectively. We have a team of experienced hands-on implementation resources ready to provide assessment and planning, solution definition, development/testing, deployment and support of all your RFID requirements. Our approach is to transform the hype and turn it into reality!"

"Despite the availability of off-the-shelf RFID components, to successfully assemble them into stable industrial solutions requires specialized expertise and experience. We have the necessary skill-set and domain knowledge to meet our customers' RFID goals. We also believe in building a strong relationship with our customers, to understand their business challenges and to use RFID technology to achieve real benefits. Our customers' success is also our success," says Dr. Mohan Kakar, Ph.D., VP Operations and Technology.

RFID Technical Lead, Mr. Jansen Ng says, "We like to see ourselves as a neutral integrator of customized and scalable RFID solutions. There isn't a one-size-fits-all RFID solution in the market and there is so much confusing information out there. Therefore, based on our professional assessment service, we look at the customer's operations and business needs and then recommend the effective application of RFID components. We have developed a tried and tested RFID Reference Architecture and industry proven processes to help our customers quickly enjoy the value that RFID Technology offers."

ABOUT IT Intellectuals -- IT intellectuals is a woman-owned Michigan Corporation in business since 1999. Its IT Solutions and services include project and resource solutions in RFID Technology; Application development and testing; Enterprise Application Integration; BPR; and Legacy systems migration and support, etc.
